

Island For MSPs

A Browser Built for Work

Consumer Browsers Were Built for Surfing. Island Was Built for Working.

“If you’re not paying for the product, you are the product.”

The most used business application is the one nobody ever thinks to question: the browser. Chrome, Edge, and Safari were made for consumers. Not for work. Not for security.

Island for MSPs is different.

It’s a secure, policy driven browser made for how modern users work, on any device, from anywhere, with zero trust security at its core.

Browser Security Add-ons vs. Island for MSPs

Clarifying the difference between browser security add-ons and Island for MSPs.

Browser Security Add-ons	Island for MSPs
<ul style="list-style-type: none">• A browser extension	<ul style="list-style-type: none">• A browser built for work, designed to separate work & personal
<ul style="list-style-type: none">• Solves narrow problems like DLP or phishing	<ul style="list-style-type: none">• Secures the entire work experience with policy, audit, and control
<ul style="list-style-type: none">• Easy to disable or circumvent	<ul style="list-style-type: none">• Deeply embedded enforcement
<ul style="list-style-type: none">• Serious personal privacy risks	<ul style="list-style-type: none">• Business use is separated from personal activity
<ul style="list-style-type: none">• Yet another product in your stack	<ul style="list-style-type: none">• Consolidates multiple tools into one lightweight platform
<ul style="list-style-type: none">• Additional product COGS	<ul style="list-style-type: none">• Reduces stack size and boosts margin potential
<ul style="list-style-type: none">• Useful for targeted needs	<ul style="list-style-type: none">• Useful for all users and environments

**Island for MSPs is not an add-on.
It’s a new foundation.**
