Island
For MSPs

VDI Replacement

Replace Virtual Desktop Infrastructure with a lightweight, elegant solution that's easy to implement and manage, and that users love.

VDI costs a ton, and users tend to hate it. That's a recipe for losing a good client.
With Island for MSPs, you help your clients deliver major savings, enterprise-grade security, and a user experience people actually love–making you the hero.

Why VDI Fails - Why Island for MSPs Wins

Why VDI Fails	Why Island for MSPs Wins
• High cost and complexity	• Simple SaaS delivery with no infrastructure
• Poor user experience	• Seamless, secure experience users actually enjoy
• Difficult to manage and scale	• Instant deployment and easy to manage
• Infrastructure and license sprawl	• Reduces infrastructure and simplifies licensing
• Duplication of endpoint security in the cloud	• Consolidates endpoint tooling into the browser
• Added burden on MSP operations and margins	• Lowers product COGS and reduces support load

Ideal for:

Clients struggling with VDI UX or cost	Contractor access without full infrastructure	Offshore teams & BYOD
