Island
For MSPs

BYOD Security

Your clients want the flexibility of allowing employees and contractors to use personal devices, but the tradeoff has always been risk. Legacy solutions like VDI are complicated, expensive, and hated by users. And browser extensions? A privacy nightmare.

Island for MSPs fixes this.

- Lightweight 30 second install
- Separation of personal and business use
- Protect company systems *from* any endpoint.
- Complete visibility and control without violating privacy
- Full audit logging of sessions, files, and activity
- No VPN or VDI required

Ideal for:

Contractors on unmanaged devices

Remote workers

Clients resisting full device lockdown policies

BYOD – Bring Your Own Disaster? Not Anymore.
